

## **MOTIVATION**

We wanted to create a data management system through application of code we have learned in the very 1st year of our collage study. We have made a system to efficiently process data from text files and make the student management system more organized.

## **CONCLUSION**

In conclusion, we have successfully developed a DATA MANAGEMENT SYSTEM that meets the specified objectives. This system features showing multiple info as per requirement, to take new inputs controls, and a printing data in an appealing interface.
